

CANDY

2 accessories in 1!

Steam&BBQ Tray

Even cook **fish** and **vegetables** with a **touch of steam** and just turn the tray to get a **smokeless BBQ**.

How to use it

Pour into the 35mm tray 200 ml of water and then insert the smart tray inside it.

Do not leave the tray inside the oven during the pyrolytic cleaning.

BBQ

1. Insert the Steam&BBQ Tray in its concave side inside the tray with the food you would like to grill on it and start the BBQ function.
2. Get a BBQ result at home with little smoke thanks to the drainage action of the fats on the bottom of the tray.

Steam

1. Insert the Steam&BBQ Tray in the convex side, place the food you want to cook with the steam and start the steam function.
2. The special concave shape allows correct humidity circulation generated in cooking, keeping the food humidity rate high.

NOTE: Do not leave the tray inside the oven during the pyrolytic cleaning.
